

COMMUNITY CENTER DRIVE STREETSCAPE

Weston, Wisconsin

DESCRIPTION:

CWE, Inc. (CWE) and its landscape architects were selected to provide the design and construction inspection services for the street scaping phase for the new Community Center Drive. The project was funded as part of a TIF district.

The project provided access to a new healthcare facility and also served to provide access to STH 29 at the busy CTH X intersection for the new businesses that would be located in the Community Center Drive development.

The design and construction of the new road included new storm sewer, storm water detention basins, asphalt pavement, curb and gutter, sidewalks, decorative street lighting and traffic signage and street scaping. CWE's inspection insured that a consistent theme and specifications for the Village's street scaping projects would be maintained.
