

SAINT CLARE'S HOSPITAL CAMPUS STREETS Weston, Wisconsin

DESCRIPTION:

The Village of Weston announced that Saint Clare's Hospital and the Marshfield Clinic were jointly planning to construct a \$150 million Regional Hospital and Medical Complex on a large tract of land at the southwest corner of STH 29 and CTH X in Marathon County. The Village of Weston contracted with Central Wisconsin Engineers & Architects, Inc. (CWE) to design all the roads and infrastructure needed to support the complex and the associated heavy traffic load that would be generated from this regional medical center.

The scope of the project included approximately 3 miles of 4-lane asphalt paved streets, curb and gutter, sidewalks, center landscaped median, sanitary sewers and water mains, storm sewers, traffic control signals, signing, and decorative street lighting.

CWE was also contracted to provide all of the construction administration on the project for the Village of Weston. CWE prepared all documentation and permit applications required by the Marathon County Highway Department, the WisDOT and the DNR. The project was designed and bid with all necessary documentation, permits and reports completed by CWE.
